

# Royal Pier Waterfront Southampton

RPW (Southampton) Ltd is a joint venture between Morgan Sindall Investments Ltd and the Lucent Group. We are involved in urban and community regeneration projects and visionary strategic land development across the UK, and have been selected by Southampton City Council to deliver at Royal Pier and Mayflower Park one of the finest waterfront destinations in Europe.

A place to: **enjoy / relax and dine / shop / play / live / work / travel / enjoy maritime heritage**

An exciting  
new waterfront  
for Southampton

This exhibition focuses on proposals at Trafalgar Dock and the relocation of Red Funnel from its current location at Town Quay. This move will free up a large area of land to the east of Royal Pier and provide enhanced facilities for ferry users.

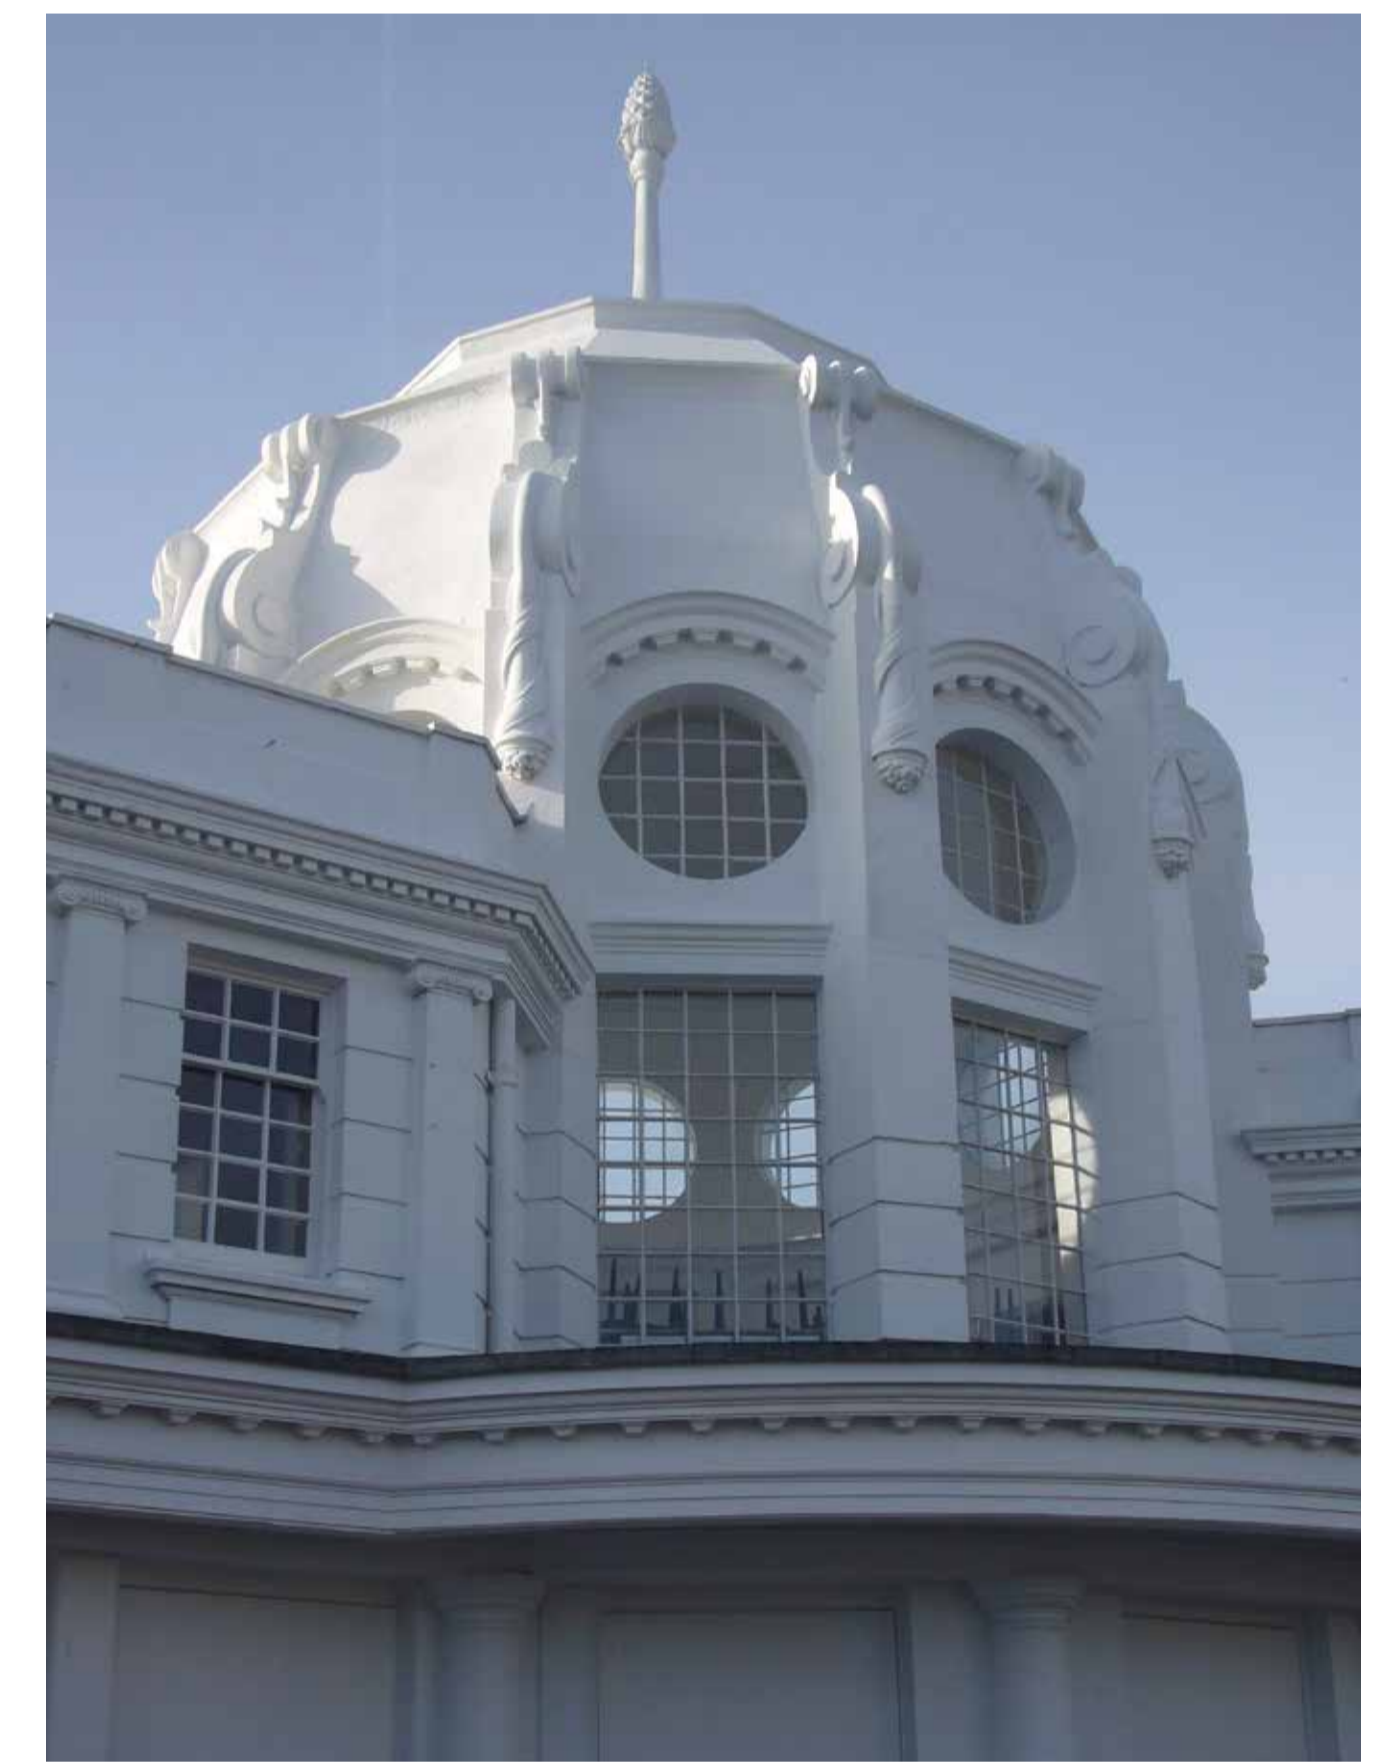

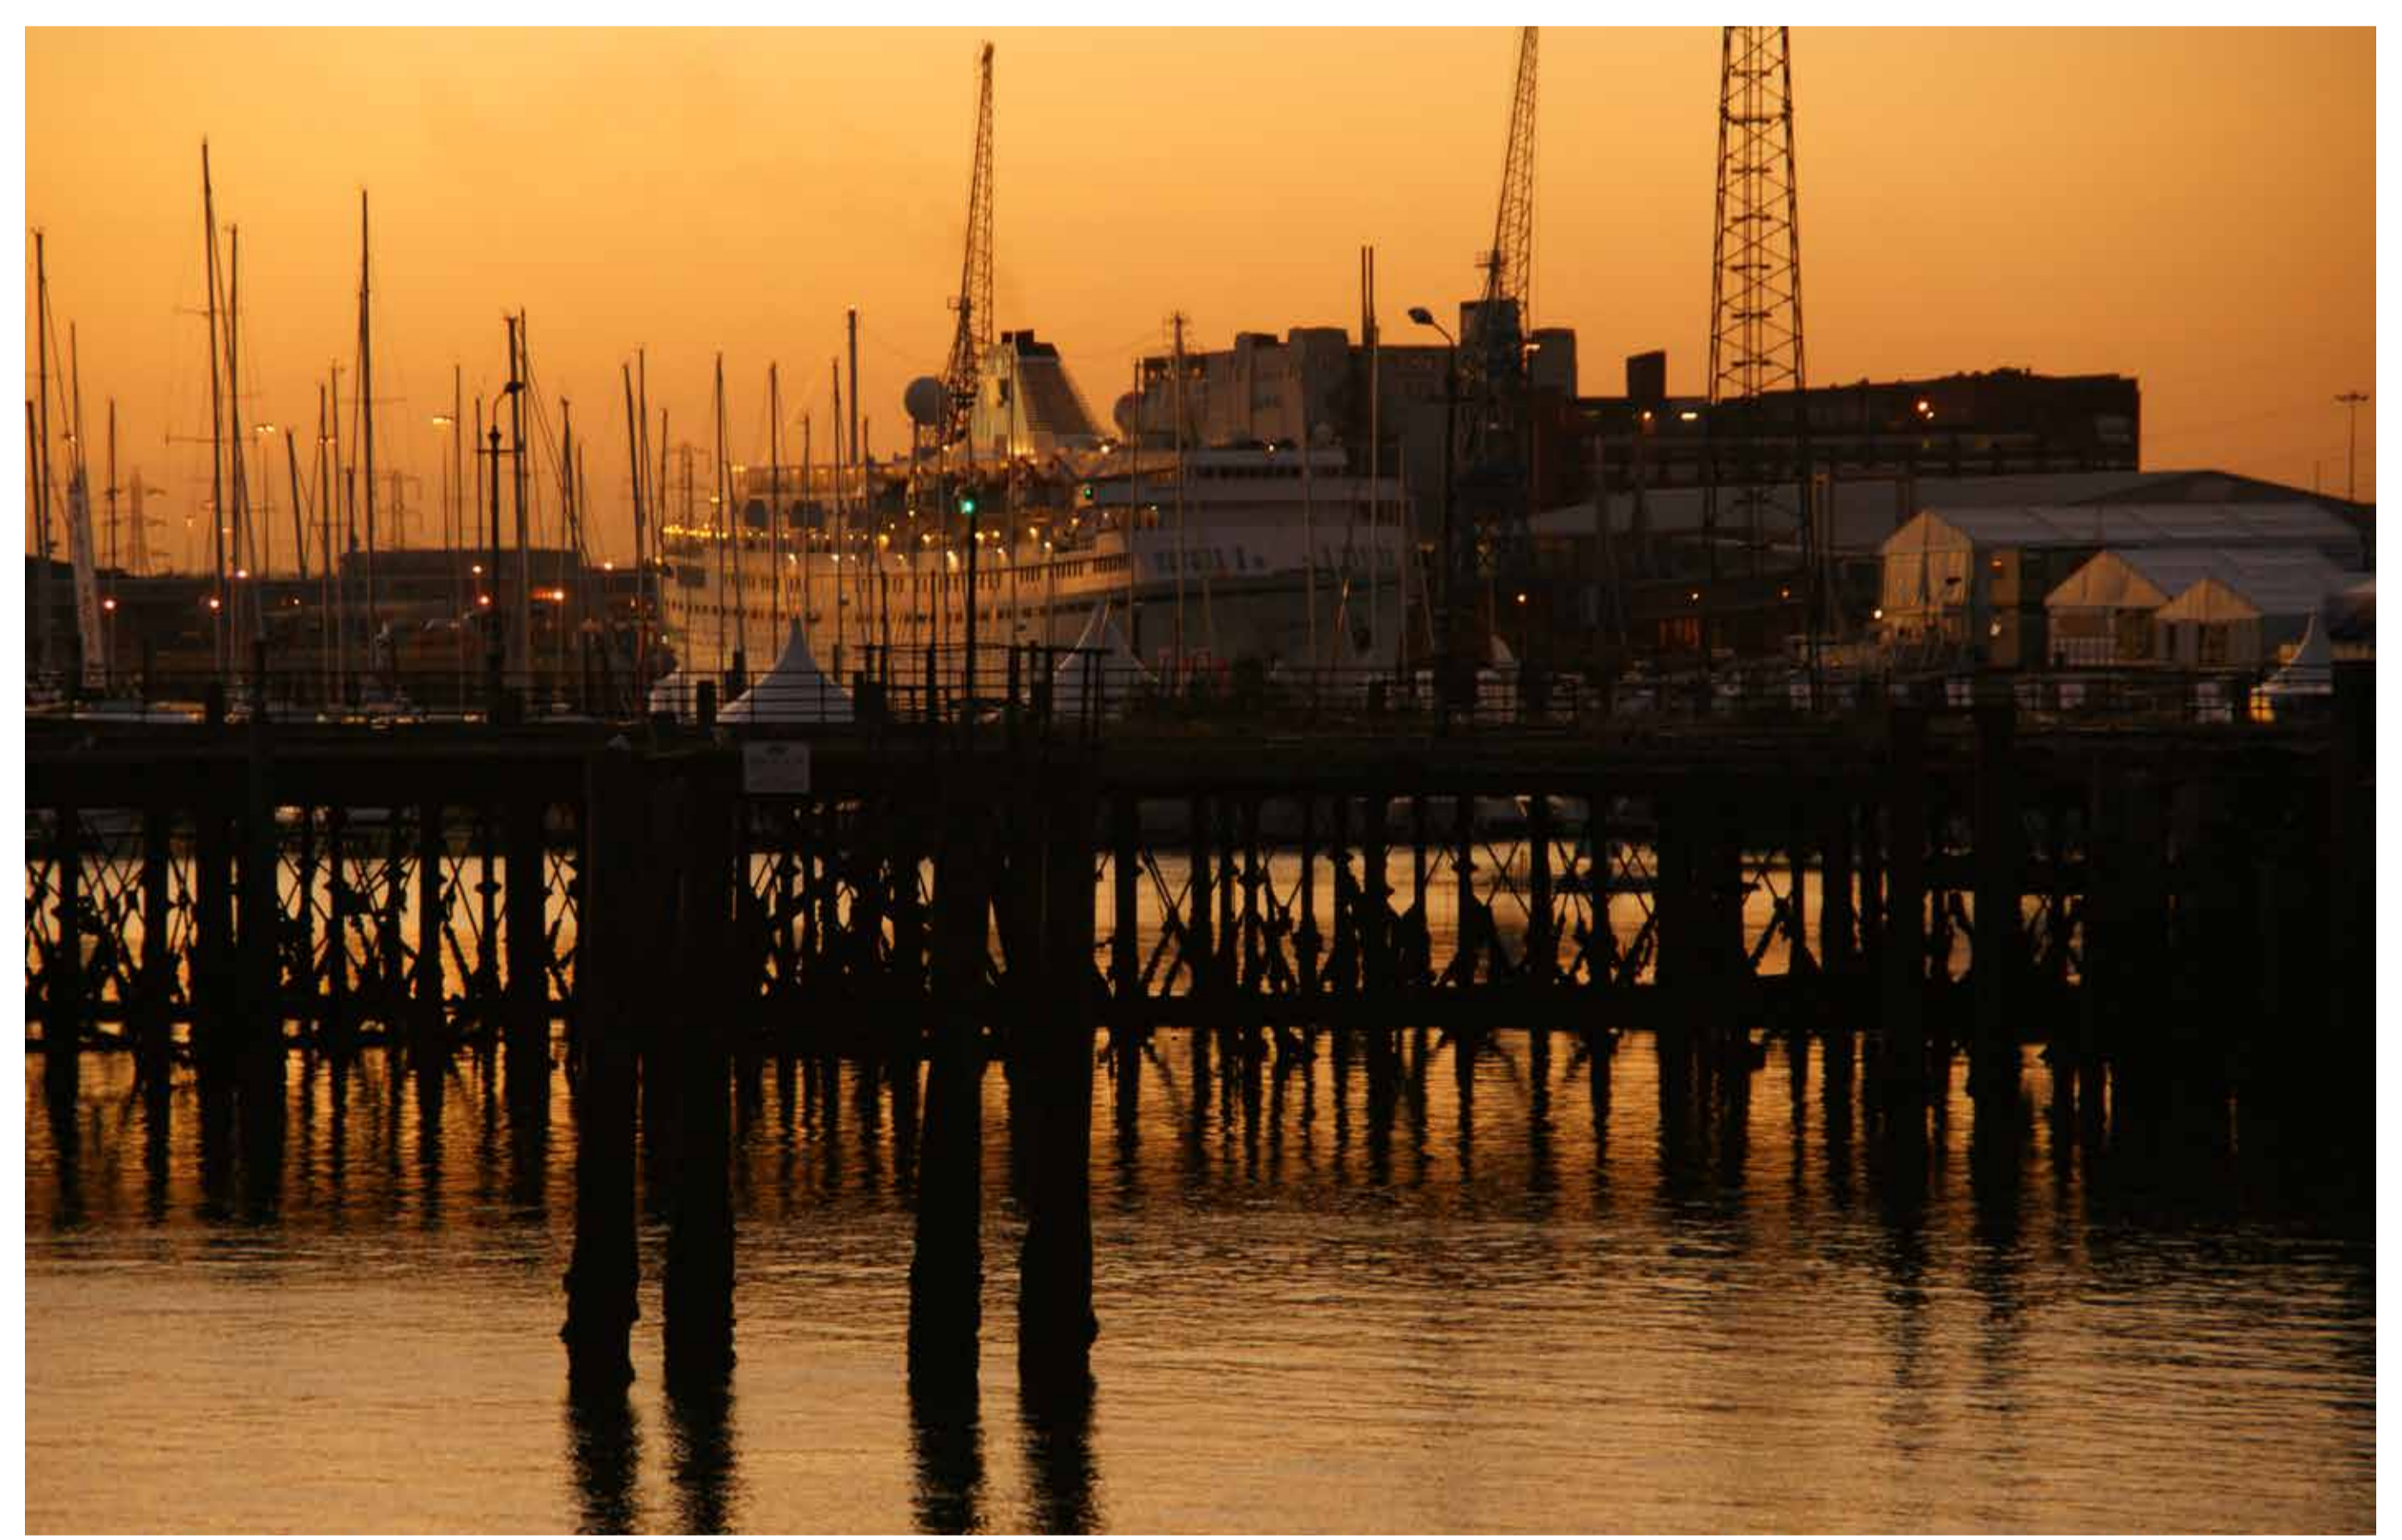

In July 2014 we held an exhibition to introduce ourselves and set out the emerging vision for this key part of the city. The exhibition also set out feedback from a series of workshops that involved key local stakeholders and addressed heritage, marine and leisure/recreation issues.

**We have reviewed all of the comments received following the July exhibition, and have identified the issues of most importance to you.**

**The design team is currently testing various options for the delivery of the main Royal Pier Waterfront site to ensure that it will be a world class destination. Further consultation on this part of the proposals will take place in spring 2015.**

We have assembled a talented team to develop the vision and to work with key stakeholders and statutory authorities, to create a sensational waterside destination. The team includes:

- Aecom
- Hyland Edgar Driver
- Lyons+Sleeman+Hoare
- Ramboll
- Ridge
- Stride Treglown
- Terence O'Rourke
- WSP

**please make this happen,  
Southampton needs it**
